

Your One-Stop Shop

Crafting The Future Of Industrial Cooling

When it comes to cooling towers there isn't room for second-best or second guesses. Mediocrity is the enemy of efficiency and cost-effectiveness. For over 30 years, CTR (Cooling Tower Resources) has been redefining what excellence means in the cooling tower industry. We are the company cooling tower repair leaders rely upon when failure isn't an option.

Our team at CTR is so nimble, we turn "impossible" into "consider it done." We aren't content to just meet the industry standards, we are too busy setting them.

Unparalleled Inventory and Efficiency

CTR is the partner that allows a single purchase order to unlock a universe of possibilities. Our inventory is so vast that it makes our competitors blush. CTR allows you with a single purchase order to have access to an inventory of over 17,000 unique parts, valued at more than \$15 million. But this is above and beyond inventory; it's your arsenal against downtime, delays, and money hemorrhage.

Strategic Locations and Rapid Delivery

With the majority of the field-erected cooling towers located in the Gulf Coast Region, CTR is located within just a few driving hours from these facilities and yet close enough to support material requirements to points North, East, and West in the continental United States. We export globally from the Houston port. Our strategic locations along the Gulf Coast aren't just warehouses - they're launchpads for same-day shipping, propelling solutions to your site at breakneck speed, affordability, and efficiency.

Our in-house logistics pros don't just ship products—they orchestrate efficiency. They don't just fill trucks; they Tetris-pack them to maximize capacity and minimize costs. Multiple products, one delivery, zero hassle. It's not just shipment tracking; it's real-time supply chain enlightenment.

Decades of Expertise in Cooling Tower Fabrication

We've been fabricating cooling tower parts for three decades.

We know all the unique challenges and requirements involved with your cooling tower repair project, an understanding that only decades in the industry can give us insight into. We know cooling tower construction inside and out. This allows us to use every material from fiberglass to wood in the most optimal manner.

Our cutting-edge equipment and advanced production techniques allow us to ensure every part meets or exceeds the industry standards. Every part has to pass our own meticulous in-house quality assurance test throughout all the fabrication process.

Because we have mastered our production process, this ensures that you get your parts fast. Reducing your wait time, which, ensures your project gets done on time and in turn, cuts down on your costs.

Beyond Cooling Towers: Custom Fabrication Services

While cooling tower is in our name, we have so much more to offer. We also provide bespoke custom fabrication services. At CTR our team has years of hands-on experience working with fiberglass, metal, and wood.

Along with our precision machinery we transform these raw materials into anything and everything you need or desire. It doesn't matter whether it's intricate components or simpler parts made from customer supplied drawings, at CTR every aspect is handled accurately and expeditiously. If need be, we work with you 1-on-1 every step of the way during the fabrication process.

Your Complete Cooling Tower Resource

At CTR, we offer an unparalleled range of cooling tower products and services. Our vast inventory and expertise make us the go-to partner for all your cooling tower needs.

Extensive Inventory

With over \$15 million in stock and more than 17,000 unique parts, we ensure you have access to everything you need. Our inventory includes:

- Structural fiberglass shapes in polyester and vinyl-ester resins
- Pultruded and molded grating
- Structurally graded Douglas fir, redwood, and plywood (treated per CTI Standard 112)
- Fan stacks in various diameters and heights
- Stainless steel hardware (304 & 316 grade)

Our Commitment to Excellence

Currently, most companies abide by "good enough." At CTR we don't believe in that. We choose exceptional.

In order to not only meet but exceed the highest quality standards we take a very meticulous approach. We give unwavering attention to the slightest of details to make sure every project is above expectations.

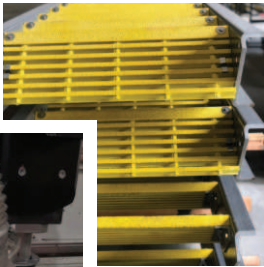

Choose CTR when custom fabrication flawless execution, quick turnaround, and perfection are the only options.

Custom Solutions

We specialize in custom fabrication to meet your specific requirements:

- Custom fiberglass stairways, access ladders, cage ladders, platforms, and walkways
- Water distribution systems, including FRP header pipes, saddles, and CNC fabricated lateral lines
- Precision metalworking for sheet metal, structural steel, and custom fabrication
- Custom deck hatches, fiberglass distribution boxes, canopies, and shrouds

State-of-the-Art Fabrication

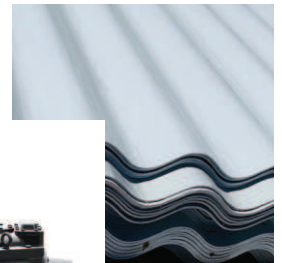

Our advanced fabrication capabilities include:

- Precision metalworking with CNC plasma cutting, welding, forming, and finishing
- Lumber and fiberglass fabrication using MultiCam™ CNC routing machines and TigerStop™ Fabrication Systems
- In-house design and shop subassembly services

Comprehensive Product Range

We stock a wide array of cooling tower components:

- The largest selection of gearboxes and cooling tower fan assemblies
- FRP casing panels in 4.2, 5.3, and 7.2 profiles (general-purpose and fire-retardant)
- Fill, drift eliminators, grid hangers, and Dri Seals

Efficient Service

We understand the importance of timely delivery in your industry. That's why we offer:

- Same-day shipping on many items
- A convenient will-call window for immediate pickup

At CTR, we're committed to being your one-stop shop for all your cooling tower needs. Our extensive inventory, custom fabrication capabilities, and efficient service ensure that you have the right parts at the right time.
